

BOOST

Construction Management Accelerator Program (CMAP)

Collaboration, communication and mutual support are the foundation for success and excellence. To help foster growth in these areas and improve our commitment to excellence on our projects, Skanska is offering the **BOOST** (Building with an Objective to provide Opportunity through Sustainable Training) **Construction Management Accelerator Program**. This series of classes will provide tips on successful bidding, LEED® tracking and project execution. In addition to learning Skanska procedures, it's a great opportunity for your firm to get to know the Skanska employees with whom you will be working.

Program Instructors

The CMAP course will be taught in house by Skanska executives, operations and preconstruction team members. The course outline addresses topics that are traditionally challenging for contractors. Participants will find the format to include lecture, group discussions, and hands-on demonstrations with proven business practices.

Who is attending?

Thirty subcontractor firms will be selected and invited to attend the BOOST CMAP course. Selected firms will be notified by December 10th. You and your employees are cordially invited to participate in this program (limited to two employees per company). Space is limited! **Fill out the application and submit to carol.campbell@skanska.com if interested in signing up for this training.** Interested participants must be able to commit their time to the scheduled courses for the duration of the program and may not miss more than one class to successfully complete the program. All graduates of the program will receive a Skanska Certificate of Completion.

Program schedule

All classes meet 4:00 – 6:00 p.m.

Jan 15 – Feb 12 classes meet at Williams Factory SBI

Feb 19 – Mar 19 classes meet at Skanska's Seattle office
